

Business Question and Visualization Report

Date	28 Aug 2026
Team ID	Girish Pol
Project Title	Global AI Adoption in Education: A Comprehensive,Global Performance Intelligence Report
Maximum Marks	5 Marks

Business Questions and Visualizations

Q1: Which countries are represented in the AI education dataset?

Sheet Used: Sheet 13 – Visualization: Geographic Map representing the countries included in the dataset. **Insight Provided:** The map provides a global overview of the dataset and highlights the geographical coverage of the analysis. It helps users understand which countries are included and provides a foundation for comparing AI-related education trends across different regions.

Q2: How does AI usage among students compare with teachers across different countries?
Sheet Used: Sheet 12 – Visualization: Grouped Bar Chart comparing average student AI usage and teacher AI usage across different countries. Insight Provided: The visualization allows users to compare AI usage levels among students and teachers and identify countries with higher or lower adoption. It also helps highlight the difference between student and teacher usage patterns across the selected countries.

Q3: How has AI adoption in education changed over the years?
Sheet Used: Sheet 4 – Visualization: Line Chart showing the average AI usage of students, teachers, and schools from 2015 to 2026. **Insight Provided:** The visualization demonstrates the changing adoption of AI in the education sector over time. The upward trend indicates that AI usage has increased considerably, helping users understand the growth of AI adoption among students, teachers, and educational institutions.

- Q4: What is the distribution of AI adoption levels in education?**
Sheet Used: Sheet 5 – Visualization: Bar Chart displaying the number of records

classified into High, Moderate, and Low AI Adoption categories. Insight Provided: This visualization provides an overview of the overall adoption level of AI in education. It helps users determine which adoption category has the highest representation and understand the current distribution of AI adoption across the data

Q5: How is AI usage growing across urban and rural communities?

Sheet Used: Sheet 6 – Visualization: Comparative Chart showing the growth of AI usage in urban and rural communities from 2015 to 2026. Insight Provided: The visualization compares AI adoption between urban and rural communities and shows how usage has developed over the years. It helps identify differences in adoption levels and provides insights into the changing AI usage patterns across both types of communities.
